

Subject Line: Saving babies' lives through successful implementation of newborn screening

AACC cordially invites you to attend the workshop, “Early diagnosis of biochemical genetic disorders saves children’s lives: A discussion on the merits and the process to successfully implement newborn screening.”

The workshop seeks to convene those lab experts who would conduct newborn screening with public health officials and other stakeholders integral to implementation in India. The program will be held in conjunction with the Association of Clinical Biochemists of India’s annual national conference.

Experts in the field of biochemical genetics and newborn screening from the US and India will describe the global position of newborn screening, clinical successes, and technical and practical aspects required for setting up a successful laboratory for newborn screening. The workshop will present real-world cases from India and the United States. The US Centers for Disease Control and Prevention (CDC) will present important elements of quality for developing a whole population screening program.

The event will take place on **Wednesday, October 24, 2018, 9:00 AM - 3:30 PM at Vivanta by Taj in Panjim, Goa, India.**
